**Re: Mill site.**

We have filed for Small Mine Site ( 5 Acres ) in Section 9. ( See attached map. ) We will haul ore to a privately owned 160 acres block of land located in Section 1 and 12. Forty (40 ) acres in Section 1 -T19S -R24E -SW1/4, SE1/4, SLB&M, one hundred twenty ( 120 ) acres in Section 12 - T19S-R24E, W1/2, NE1/4, NW1/4, SE1/4. ( See attached map. ) We request permission to set up a crushing plant and a Non Toxic Recovery System. We have cleared and bladed approximately 10 acres NW of the old homestead ( formally irrigated hay field reported harvest of 20 ton per acre). We will be using a three crusher system with a sand classifier to separate the metals from sands. We will introduce water into the second crusher to minimize dust. Our water will be run through a Desander into two 5' X 8' X 30' steel water tanks to recirculate. There will be one small tailing pond. A flow sheet is sketched. We will use a diesel power plant for electricity.

If there are other permits, fees or questions about this plan please contact me at:  
Ph. 806-872-0767 or Fax 806-872-0869
